

Proper usage of the EnerBurn single dose container

EnerBurn is an amber colored liquid with a hydrocarbon odor

Single dose containers come in 16 and 32 ounce sizes

Handle EnerBurn as you would any other hydrocarbon based liquid. Avoid contact with eyes, skin and clothing. A safety Data sheet(SDS) is available at https://enerreckchemical.com/datafiles/forms/EC5931A_EnerBurn_MSDS_2021Revision.pdf

Using the Dosing Container

- Use the dosing chart on the container to determine correct dosage
- Loosen the cap on the dosage chamber of the container
- Gently squeeze the container until the desired amount of EnerBurn is in the dosing chamber
- Pour the entire dose of EnerBurn into the fuel tank, using a funnel if necessary
- Protect the surface around the fill port with a cloth
- Keep the EnerBurn container tightly capped and stored in an upright position when not in use

The catalyst will mix with the fuel on contact
